BAMBOU CABINET

Please use the anti tip kit provided for safety. Please ensure the correct fittings are used for the chosen wall substrate:

WOOD

BRICK

CAVITY
(Special fittings needed)

ASSEMBLY

1. Mark the location of the hole on the wall using bracket approx 1" below the top of furniture. Predrill the holes at marked location & insert wall plug. Align bracket onto wall plug & secure using long screws

2. Move the furniture to its final position against the wall and mark the location of the wall bracket on the back of the furniture. The bracket that attaches to the furniture must go into the solid wood piece at the top, not into the thinner back panel. Move the furniture away from the wall and place a bracket on the mark. Mark and drill holes for the screws using a 3/32 drill bit. Attach the bracket to the furniture using the short screws

3. Move the furniture to its final position and align the bracket on the furniture with the bracket on the wall. Thread the strap through the bracket as shown, and tighten until snug. Do not over-tighten

IMPORTANT

Check that the wall bracket is firmly screwed into the stud, the furniture bracket is firmly attached to the frame, and the strap is snug
